PROFESSIONAL SUMMARY

Final-year BCA student (CGPA 8.4) with hands-on experience in machine learning, NLP, and Computer Vision, Built Samarpan an AI-powered quiz and proctoring platform that won 3rd place at CSJMUIF Ideathon 2026. Also built and deployed Dharma Setu, a full-stack LLM-powered product live in production. Comfortable across the full ML pipeline from Data Preprocessing to model deployment, and experienced connecting LLM APIs to real user-facing products.

TECHNICAL SKILLS

Languages: Python, SQL, HTML, CSS

ML & Data: Scikit-learn, Pandas, NumPy, Regression, Classification, EDA, Feature Engineering

Computer Vision: OpenCV — Image processing, Real-time detection, Face-based proctoring

NLP & AI: Text preprocessing, TF-IDF, LLM API integration, AI Agents (foundational)

Tools: Jupyter Notebook, Git, Vercel, VS Code

PROJECTS & PUBLICATIONS

Samarpan Quiz Platform | Ideathon 2026 Winner | 2025

- Built an AI-powered quiz platform with auto and manual quiz generation from PDFs; integrated real-time face-based cheating detection using OpenCV computer vision proctoring.
- Won 3rd rank at CSJMUIF Ideathon 2026 among competing teams; platform includes performance analytics dashboard for students and instructors.

(Dharma Setu AI) Spiritual Guidance Platform | Live: dharma-set.vercel.app | 2025

- Full-stack AI product on Vercel mapping real-life problems to insights from the Bhagavad Gita, Ramayana, and Mahabharata using LLM API integration.
- Designed the shloka-to-problem mapping architecture; product is live in production with context-aware, personalised responses.

ML Models - Disease Detection | Car Price Prediction | 2024

- Classification model with EDA-driven feature selection for early disease detection; regression pipeline on vehicle data with full preprocessing, evaluated using RMSE.
- NLP spam classifier using tokenisation, TF-IDF, and classification achieving reliable spam detection with high precision.

Computer Vision - Colour Detection | 2024

- Character recognition model using Image Preprocessing and pattern matching; real-time HSV Colour detection with contour analysis on live video frames via Open CV.

ACADEMIC HISTORY

Bachelor of Computer Applications (BCA)

CSJMU, Kanpur | 2nd Year (Pursuing)

CGPA: 8.4 / 10

Intermediate (PCM)

Air Force School, Gorakhpur

Percentage: 80%

High School

Stepping Stone Inter College, Gorakhpur

Percentage: 92%

AWARDS AND CERTIFICATION

IIIrd Rank - CSJMUIF Ideathon 2026

Samarpan Quiz Platform | CSJMU Innovation Foundation

Won 3rd place for building an AI-powered quiz & proctoring platform

Additional Knowledge

Large Language Models & AI Agent Design

Model Optimisation - Hyperparameter Tuning, Cross-Validation

Computer Vision Pipeline Fundamentals

Workflow Automation & LLM API Integration
